3. and onward. Use as many concise (numbered) paragraphs as you need to describe your interest and involvement that support your desire to change the FCC RF safety guidelines.

I am a disabled senior with a blind 83 year old husband. We need our land line for the many robo call alerts we get regarding fires in southern California. Also, for the many brown and black outs we experience here. In these events, cell phones often don't work due to overload. Our land line ensures that we can get help when we desperately need it.
